Candidate C-01

3rd-year BSc Computer Science & Artificial Intelligence, IE University, Madrid
Available for a 6-month internship from February 2027
Contact details withheld for this exercise

Education

IE University, Madrid 2024 – 2028 (expected)
BSc Computer Science & Artificial Intelligence
Relevant coursework: Data Structures & Algorithms, Databases, Software Engineering, Data Analysis, Machine Learning Fundamentals

Technical skills

- **Languages:** Python, SQL
- **Libraries & frameworks:** pandas, scikit-learn, FastAPI, Plotly, pytest, requests
- **Data & tools:** PostgreSQL, Git, Docker (basics), REST APIs

Coursework projects

Library management API Software Engineering course – team of 4
REST API in FastAPI and PostgreSQL to manage book loans, returns and members, with basic pytest tests.

Sales dashboard Data Analysis course – individual
Cleaned a retail sales dataset with pandas and built a Plotly dashboard of monthly revenue and top products.

Movie recommender Machine Learning Fundamentals course – team of 3
Built a collaborative-filtering recommender in scikit-learn on the public MovieLens dataset.

Personal projects

Expense tracker 2025
Python script that categorises exported bank CSV files and plots monthly spending by category.

Weather notifier bot 2025
Python bot that calls a public weather API with requests and sends a daily Telegram forecast message.

Languages

English (C1), Spanish (native)

Candidate C-01

3rd-year BSc Computer Science & Artificial Intelligence, IE University, Madrid
Available for a 6-month internship from February 2027

Education

IE University, Madrid 2024 – 2028 (expected)
BSc Computer Science & Artificial Intelligence
Relevant coursework: Data Structures & Algorithms, Databases, Software Engineering, Data Analysis, Machine Learning Fundamentals

Experience

SkillBridge certified challenge – Northwind Data *(fictional company)* October 2026

- **Brief:** built a pipeline that ingests a messy transactions CSV, cleans and validates it, and serves summary statistics through a REST endpoint (4-hour time box, team of 3).
- **Individual contribution:** authored the validation module and the test suite (about 45% of team commits); verified by commit-history review and a walkthrough with the reviewing engineer.
- **Score:** 88/100 – **passed**; certified by the reviewing engineer.

Technical skills

- **Languages:** Python, SQL
- **Libraries & frameworks:** pandas, scikit-learn, FastAPI, Plotly, pytest, requests
- **Data & tools:** PostgreSQL, Git, Docker (basics), REST APIs
